

Pediatric Covid-19 Vaccines

- Covid-19 immunizations (Pfizer and Moderna) continue to be available every **Tuesday from 9AM - 7PM** and every **Friday from 9AM - 5PM** for **ages 5-years-old and up** at **LECOM Center for Health and Aging**, 3910 Schaper Avenue Erie PA.
- **Beginning Tuesday 6/28/2022** we will be adding availability of vaccines for the **under 5-year**-old group as well.
- Every **Tuesday from 1PM – 5PM** and **Friday from 9AM – 1PM**, we will be offering availability of the **Pfizer-PED** and **Moderna-PED** for **ages 6 months through < 5-years**.

The clinic times selected for the under 5-year-old group were designed for staffing with a registered health provider with the skills needed for this population, and to satisfy the Federal and State regulations currently in place for Covid vaccinations.

Child's Age	Pfizer-BioNTech	Moderna
6 months – 4 years old	3-dose primary series	2-dose primary series
5 – 17 years old	2-dose primary series	2-dose primary series

†An 8-week interval between doses in the initial series may be optimal for some people ages 6 months–64 years, especially for males ages 12–39 years. A shorter interval (3 weeks for Pfizer-BioNTech; 4 weeks for Moderna) between the first and second doses remains the recommended interval for people who are moderately or severely immunocompromised; adults ages 65 years and older; and in situations in which there is increased concern about COVID-19 community levels or an individual’s higher risk of severe disease.

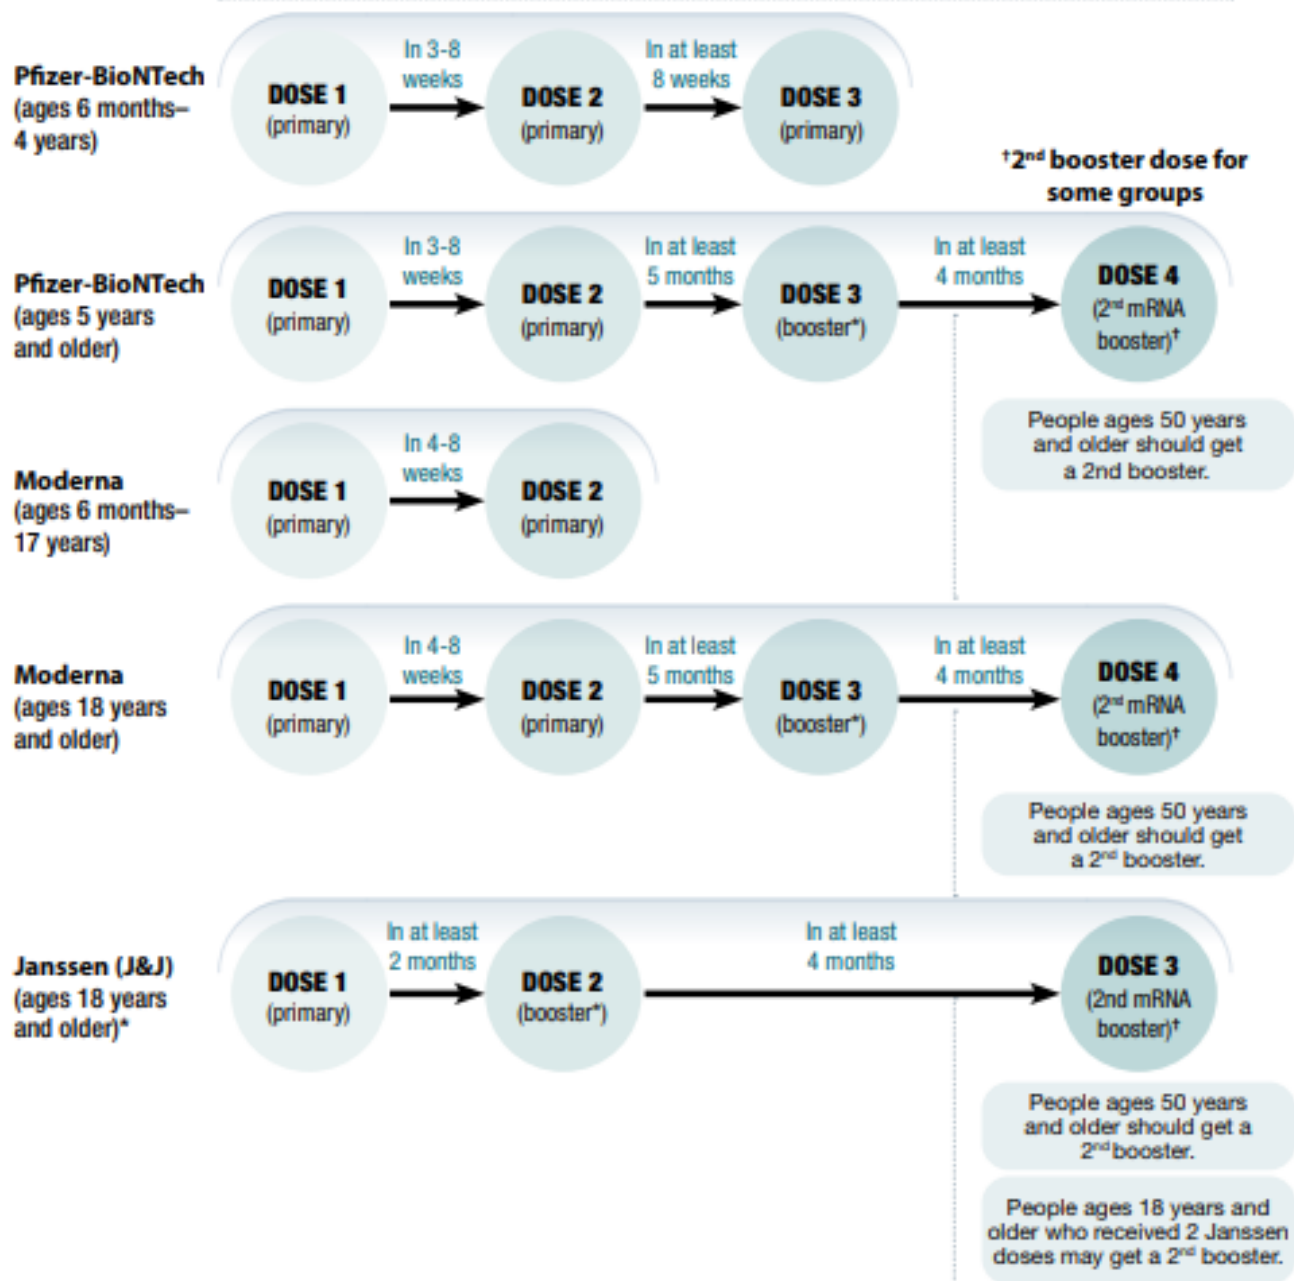

How to contact us:
